1	Ghaliya muslem alfarsi Mariam juma	Implementing a Mobile Application News Tool for Disseminating Messages and Events of AlBuraimi University College	Technology is developing and changing in every moment that all domains are natchy without it. Our research utilizes the current trends and technology to design and develop a mobile application for the all members of the college. The students are the fundamental members in the college and they are our targets. Mobile notification system is an emerging technology which influence in solving various dimensions of life. The college announcements and events are disseminated to students and staff through circulars, notice boards, emails etc. Our research was to employ mobile affinity of especially students who ignore the circulars and notifications in notice board. The tool may be installed from play store mobile.

2	Ritu Kumari	TechnomaniaNewsApp	<p>The main objective of the project is to provide people a handy [T] android application through which people can access all types of news and information. Through this application, any user can gain technical knowledge of the world and its surrounding with just one click ahead. User does not have to visit multiple sites for different related information. All information is going to be in one place.</p>

CONFIDENTIAL

			<p>Many people generally get the redundancy in the information. Sometimes, people even spread fake news, which circulates and spreads more like a disease of false information in WhatsApp and other social media.</p>
3	Ashesh Poudel	Proposal for News Paper App	<p>It is possible to create simple content areas especially targeted to advertisers directly inside magazines and newspapers. These content areas can trigger, in a given physical context by means of suitable AR tag, visualization of digital content</p> <ul style="list-style-type: none"> – video, audio, interactive 3D animations – in addition to the text, thanks to suitable devices such as smartphones, tablets and wearables. This possibility adds a new dimension to the reading experience and brings multimedia content where it previously could not be.
4	B. Bulut, V. Kalm, B. B. Güneş and R. Khazhin.	Deep Learning Approach For Detection Of Retinal Abnormalities Based On Color Fundus Images	<p>This research uses the Xception model with transfer learning method to classify images obtained from Akdeniz University Hospital Eye Diseases Department. During the analysis, the Xception model containing 50 different parameter combinations was trained by scanning the appropriate hyper-parameter space for the model.</p>

5	C K Gomathi	The Innovative Application for News Management System	<p>This paper aimed at developing an online news management system that is of information to either a college. The news management system is an internet based application that can be accessed throughout the college. There are features like email notifications, cancellation of posts, updating posts, comments section etc in this system. Online news management system provides a simple interface for maintenance of college information. The creation and management of accurate, up-to-date information regarding to the college. It also facilitate us explore all the activities happening in the college. different reports and queries can be generated based on vast options related to sports, course events, NCC, NSS, workshops, placements and even for the entire college.</p>
6	B. Goutam, M. F. Hashmi, Z. W. Geem and N. D. Bokde.	Project report of online news tracker	<p>ONLINE NEWS PORTAL, AS DESCRIBED ABOVE, CAN LEAD TO ERROR FREE, SECURE, RELIABLE AND FAST MANAGEMENT SYSTEM. IT CAN ASSIST THE USER TO CONCENTRATE ON THEIR OTHER ACTIVITIES RATHER TO CONCENTRATE ON THE RECORD KEEPING.</p>
